## HOW TO USE THE APP AND THE MDECKS

Put the cards in mDeck1 order.  
For Menu 1, use reverse order with the 3C (52) on the top (face down) and the 4C (1) on the bottom

(the face of the deck). After engaging the secret Menu 1, when any card is tapped, the next card in the mDeck's sequence is displayed!

### mDECK 1 ORDER

### ESP MIND READING

Show mDeck1, in reverse order, *as if* it's all mixed up:

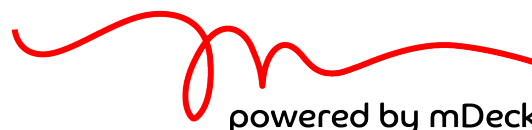

- Explain the App has the cards all in order so it's easy to locate any card quickly...
- Tap Menu 1 on the secret Menu (as previously shown).
- Have a spectator select any card - face down from the deck.
- Cut the deck where they selected their card so that the card *above* their selected card goes to the *bottom* of the deck.
- Glimpse the bottom card while setting the deck on the table or in the case.
- Scroll to the bottom card in the line up of cards in the App and tap it.
- The spectator's selected card will appear in it's own display window!
- Now you can reveal their selected card in a number of ways!
- Close the display window, and the selected card shows – as if you had tapped it instead of the bottom card!
- Restore the deck to mDeck1 order.
